

>>Opracował Wojciech Sośnicki<<

Podział sieci klasy C **148.230.98.0/24 (255.255.255.0)** na:

1 podsieć z maską **/25 (255.255.255.128)** - liczba hostów w podsieli $2^7 - 2 = 126$

1 podsieć z maską **/26 (255.255.255.192)** - liczba hostów w podsieci $2^6 - 2 = 62$

4 podsieci z maska /28 (255.255.255.240) - liczba hostów w podsieci $2^4 - 2 = 14$
